ABHIJIT MONE

Full Stack Web Developer | ReactJS & Angular Expert | Backend Node.js | Network Operations

9890615400 • abhijitmone2@gmail.com • https://www.linkedin.com/in/abhijitmone/ • https://github.com/abhijitWebDev • India

Summary

Software development professional with 3 years of experience in web development and network operations, expert in front-end technologies such as ReactJS and Angular, and back-end development with Node.js and Express. Key achievements include reducing loading time of a web application by 30% and increasing transaction completion rate by 15% through the design of user-friendly payment interfaces. Seeking a Full Stack Web Developer position, where I bring my web development and network operations skills to support your mission of providing exceptional digital solutions to your clients.

Skills

Programming Languages: · Java script · Java · Python · PHP

Web Technologies: · React. · Angular2 · Webpack · Playwright · Tailwind · Next.js · Django · Selenium · CSS · HTML5 · Vue.js · Laravel

Version Controls: · Git · GitHub

Project Management: · JIRA · Notion · Redmine

Cloud Technologies: · AWS · GCP

CI/CD: · Jenkins · Argo CD

DevOps: · Docker · Kubernetes

Databases: · Postgres SQL · Mongo DB · My SQL

Experience

Mentorgain
Pune, India

Web Developer
06/2023 - 11/2023

Ed-tech Company

- Redesigned the Authentication system, resulting in a {15%} increase in user registrations on our edtech platform
- Reduced the loading time of the web application from 60% to 30%
- Introduced a scheduler feature, improving user engagement metrics by {30%} across the application
- Developed mentorship minutes tracking, increasing user satisfaction rates by {20%} for mentors and mentees

CellPoint Digital
Pune, India

Junior Developer
10/2021 - 05/2023

Payment Orchestration platform

- Increased transaction completion rate by {15%} by designing user-friendly payment interfaces
- Ensured high product quality, resulting in {30%} reduction of customer complaints by quickly identifying and fixing software bugs
- Enabled efficient functionality for {100} users by integrating complex UI with backend systems that streamlined operations
- Automated deployment processes for {5} software releases by managing builds with Jenkins, saving {20} hours weekly
- Leveraged React-JS and ES6 JavaScript for modern web application development
- Developed APIs leveraging Java and Spring Boot for {50} project teams, improving integration speed by {25%}

Crafting Quality Technovative
Pune, India

NOC Engineer
10/2018 - 02/2019

IT services

- Resolved network issues, resulting in downtime reduction by 30% and saving costs of $50,000.
- Managed a network infrastructure for over 2,000 devices across multiple locations globally.
- Enhanced system reliability by improving incident response time by 40% by implementing a new alert system.
- Optimized network performance, improving data throughput by 25% and increasing operational efficiency.

Education

Yashwantrao Chavan Maharashtra Open University

Masters of Computer Application (GPA: 7.7/10)
2021 - 2023

Education

Yashwantrao Chavan Maharashtra Open University
Bachelors of Computer Application(GPA 7.5/10)   2018 - 2021

Tilak Maharashtra Vidyapeeth
Bachelors of Business Administration(Marketing)(GPA: 7.0/10)   2015 - 2018

Projects

Scheduling and interacting platform(Mentorgain)

Developed and maintained scheduling and interacting application, through which mentor and mentee can interact and schedule meeting between themselves.

- Increased user registrations by {30%} by developing interactive registration and login forms
- Enhanced user engagement by {30%} by developing Wishlist functionality for mentor selection
- Developed API in express and deployed it on the Firebase hosting
- Helped the founder to scale up the development process
- Guided the teammates in effective implementation of the flow
- Reduced loading by 30% by changing the region of the cloud

Vision(Cell point Digital)

The product dealt with the admin panel, where the customers can see the payment status and more

- Reduced client onboarding time by {30%} through designing an innovative integration module
- ReactJS(Class based and hooks), Bootstrap, JavaScript(Es6), Redux global state management
- Configured properties via a config-driven UI that displayed data according to the properties configured by different clients
- Resolved issues raised in production
- Utilized Postgres to generate models relevant to the data
- Done deployment of Jenkins as a part of build management
- Developed {5} APIs using Java and Spring Boot, enabling seamless integration for {10} critical application features

Hosted Payment Page(Cell Point Digital)

Developed responsive design using material UI and react.

- Enabled {$1k} in successful transactions by developing an interactive form for customer payments and bookings
- Improved system reliability by resolving {15} critical issues in production environments
- Designed the page and made it fully responsive for all screens
- Implemented asynchronous request for the bookings
- Performed unit testing using chai framework for JS
- Done deployment on Jenkins as a part of build management

Strengths

◈ **Adaptable**
Adaptable to different technologies

◈ **Front-end expertise**
Expert in front-end technologies like ReactJS and Angular, enhancing user experiences.

◈ **Performance optimization**
Skilled in reducing loading time and optimizing performance for web applications.

◈ **User interface design**
Experience in designing user-friendly interfaces, boosting transaction completion rates.

◈ **Process automation**
Proficient in automating processes, saving time and improving efficiency.
